

REDESIGNING OBF WEBSITE 0.2

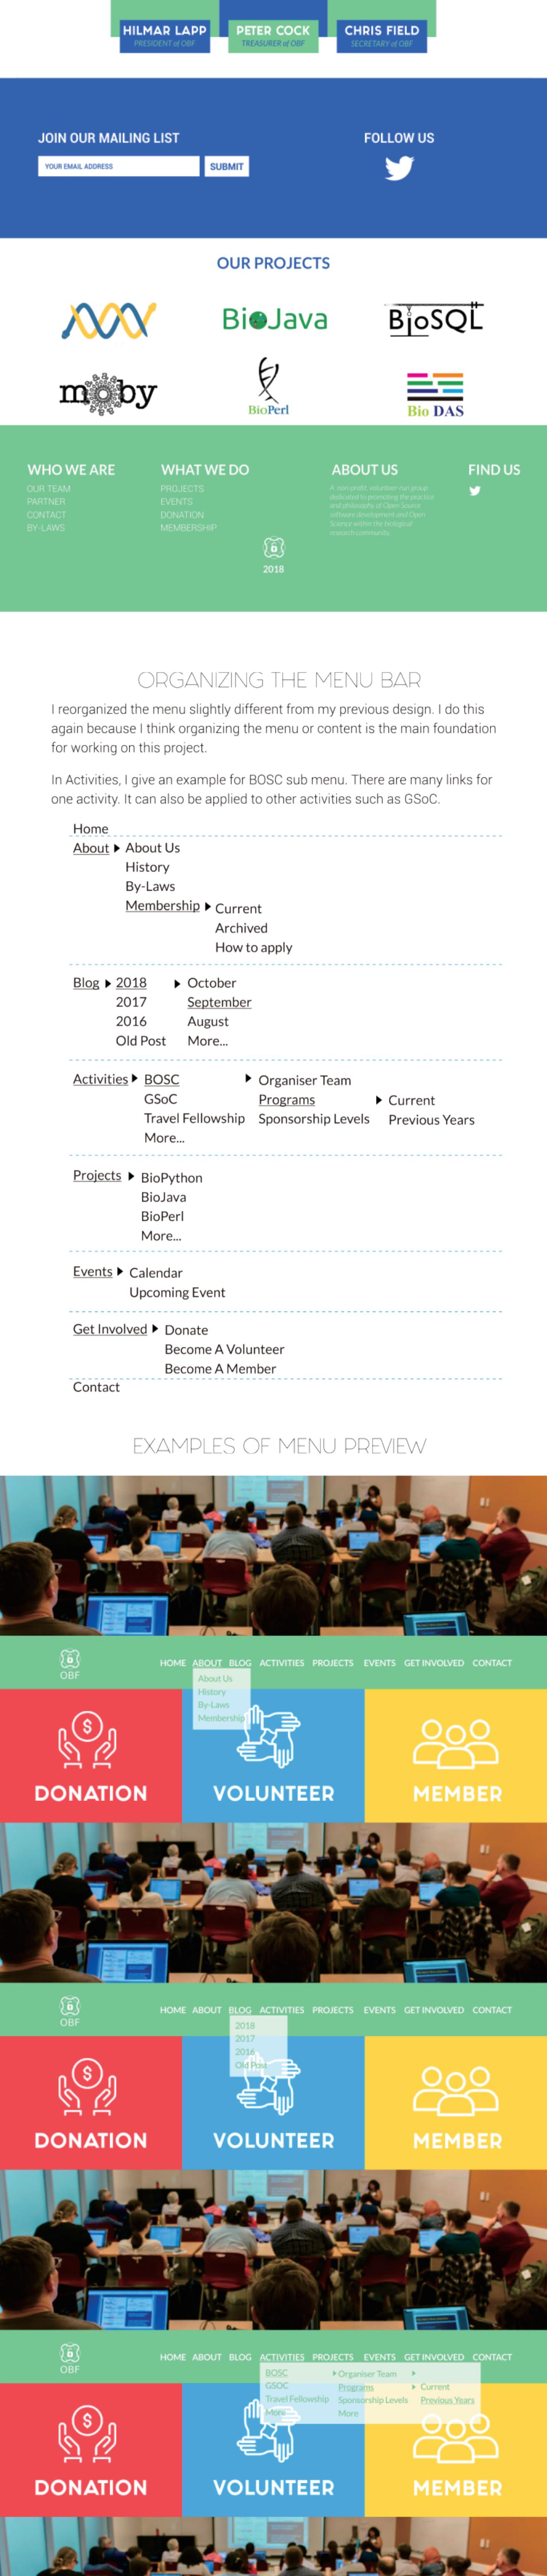

BY NUFINA

This mock-up is my second design. I made several changes in the mock-up including rearranging the content and design of the homepage itself. In terms of reorganizing the contents I describe it in the organizing the menu bar section and in terms of design changes I describe it on the homepage layout section. Regarding the matter of how to implement this design, I wrote in the previous file or visit this link https://nufina.github.io/redesigning_obf_website.github.io/.

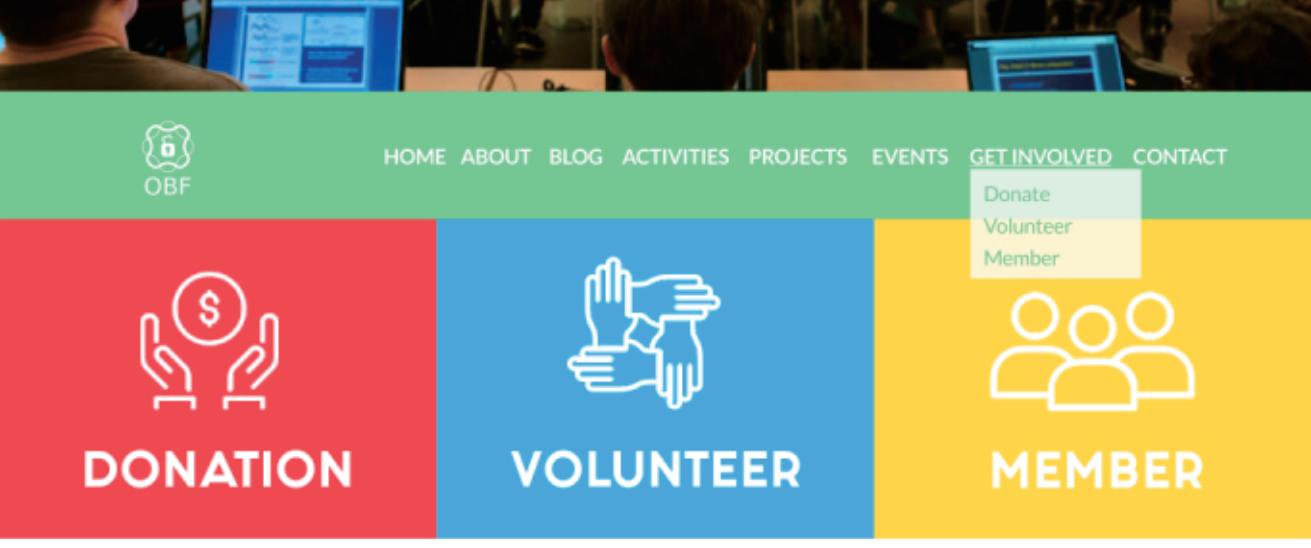

Homepage Layout

I changed the layout from the previous design and add more color in this design. In term of content, I add calendar and blog/ news in the homepage.
